

AAC CURRENT

SEED VARIETY INFORMATION

AAC Current features improved yield, standability, harvestability and stripe rust resistance

Key Features

- ◆ Strong yield
- ◆ Improved standability to Strongfield
- ◆ Resists root rot infection
- ◆ R to Stem and Leaf Rust
- ◆ FHB, loose smut, and general leaf spotting equal to Strongfield
- ◆ Improved stripe rust resistance

Technical Information

Alberta Seed Guide 2017

| Variety | Yield Category (% Strongfield) | | | | Agronomic Characteristics | | | | | Resistance to: | | Disease Tolerance | | | | |
|---------------------|--------------------------------|-----------------|------------------|------------------|---------------------------|-----------|---------------------|-----------|-------------|----------------|-----------|-------------------|-----------|-------------|-----------|-----------|
| | Overall Yield | Low < 45 bu/ ac | Med 45-75 bu/ ac | High > 70 bu/ ac | Maturity Rating | Protein % | Test Weight (lb/bu) | TKW (g) | Height (cm) | Lodging | Sprouting | Loose Smut | Bunt | Stripe Rust | Leaf Spot | FHB |
